

To Whom It May Concern:

I have had the privilege to work with Precision Surveillance Corp. (PSC) on the last two Reactor Coolant Pump Replacement Projects at Arkansas Nuclear One. PSC provided supervision and labor in the form of Iron Workers and Pipe Fitters. Both projects required the removal and replacement of motor interferences, RCP motors, motor driver mounts and the pump rotating assemblies.

PSC was instrumental in the successful completion of both of these large outage projects. PSC worked very closely with other teams pre-outage and during the outage to make the RCP Projects and overall outage successes. PSC provided knowledgeable and qualified nuclear workers and demanded they complete all task with an excellent safety record and on schedule. I whole heartedly would without any reservation recommend Precision Surveillance Corp. to you. I am sure they will be a tremendous asset to your company.

Sincerely,

Michael Harris

Field Implementing Supervisor
